

AWARTS: Claude Token Counter

awarts.club 5.0 ★ (1 rating)

Extension Developer Tools 222 users

Overview

Count Claude tokens, cache timers, and usage bars. Branded for AWARTS.

AWARTS: Claude Token Counter is the ultimate companion extension for developers and "vibe coders" using Claude.ai. Designed to integrate seamlessly with the AWARTS ecosystem, this lightweight extension gives you complete visibility into your Claude usage without ever leaving the chat interface.

Why install this extension? Claude's native interface doesn't show you exactly how close you are to the context limit or how much of your daily usage you've consumed until you hit a wall. This extension solves that by injecting precise, real-time metrics directly into your Claude.ai chat window.

Key Features:

- **Real-time Token Counting:** See an approximate token count for your current conversation alongside a mini progress bar tracking against Claude's 200k context limit.
- **Cache Countdown Timer:** Messages sent while cached are significantly cheaper and faster. This extension provides a live countdown timer showing exactly how long your conversation remains cached.
- **Native Usage Bars:** View your 5-hour session usage and 7-day weekly usage with exact, unrounded progress bars directly from Claude's internal data.
- **Privacy First:** 100% local. No data is sent to external servers. It simply reads your active session data to display the UI. No API keys required.

Note: This extension is part of the free and open-source AWARTS project. Visit awarts.vercel.app to track your cross-platform AI coding sessions and compete on global developer leaderboards.
