

Token Track

5.0 ★ (1 rating)

Extension Developer Tools 109 users

Overview

Real-time token & usage tracker for Claude, ChatGPT, Gemini, Grok and Perplexity

Know exactly how many tokens you're burning — in real time. No guessing. No surprises. Just clarity.

🚀 FEATURES

- Real-time Token Counting - Watch tokens update as you type and as AI responds
- Multi-Provider Support - Works on Claude, ChatGPT, Gemini, Grok & Perplexity
- Session Tracking - Claude Pro users see 5-hour session limits
- Weekly Usage - Track your 7-day usage percentage

- Cost Estimates - Approximate API costs in real-time
- Clean UI - Minimal, Apple-inspired design that doesn't get in the way
- Privacy First - All processing happens locally, no data sent anywhere

WHY TOKEN TRACK?

AI tools hide token usage, costs, and limits. You don't know when you're about to hit limits, how much context you're using, or why responses suddenly degrade.

Token Track fixes that with a clean widget that sits right above your input box.

SUPPORTED PLATFORMS

- Claude.ai - Token count, session %, weekly %, cost estimates
- ChatGPT - Message limits, model detection, context tracking
- Gemini - Token counting with 1M context window
- Grok - Real-time token tracking
- Perplexity - Query limits and token usage

ACCURACY

- Claude: 95-100% (API-based, uses actual conversation data)
- ChatGPT / Gemini: ~85-95% (DOM estimation with smart tokenization)
- Real-time typing preview included

PRIVACY & SECURITY

- ✓ 100% Local Processing - No external servers
- ✓ No Data Collection - We don't collect anything
- ✓ No Tracking - No analytics, no telemetry
- ✓ Read-Only Access - Extension only reads data, never modifies

HOW TO USE

1. Install the extension
2. Visit claude.ai, chatgpt.com, or gemini.google.com
3. Refresh the page once
4. Done! The widget appears above your input box

The widget shows:

- Token count (updates in real-time)
- Session percentage (Claude Pro)
- Weekly usage (Claude Pro)
- Cost estimates
- Color coding (Green → Yellow → Red as you approach limits)

💡 PERFECT FOR

- Power users tracking AI usage
- Developers monitoring API costs
- Teams managing token budgets
- Anyone curious about their AI consumption
